A poetic journey on the “Faster Than Thought” Aquarian Movement through the use of Art. Water has a Soul/Spirit. Spirituality, Transcendental Consciousness, Traveling through the Spiritual Hierarchy, Evolution & New Science, Information Technology & The World Wide Web, Future of Humanity. Author – R. A. B. Warden, Ph.D. in Metaphysical Psychology. In English, in Japanese and in Chinese. www.rabbithouse.com/ info@rabbithouse.com Or buy through AmazonGlobal

wetness, accuracy and reliability of a rainfall measurement system over a long period. Over the past two decades, scientific interest in rainfall measurement has been increasing due to the recognition of the impact of rainfall on air quality, climate change, hydrology and soil moisture. This work describes the global wetness (i.e., the amount of total rainwater falling on the ground in a time interval), collected from rain gauges over a long period of time, and assessed the reliability and accuracy of the measurements. Rain gauges were included in the Tropical Rainfall Measurement Mission that flew over the tropical Pacific Ocean in 2007-2011. Two months of rain gauges from the Tropical Rainfall Measurement Mission and eleven representative gauges from the gauging network of the European Centre for Medium-range Weather Forecasts (ECMWF) were selected for comparison. The results indicated that the GPS-radiosondes were generally more reliable than the rain gauges, though the absolute accuracy was quite low at a short-range (e.g., less than 10 km). Moreover, a marked global wetness was found on all the gauges, but there were large differences among the
